ACR39U
Selected Card Reader for HK Gov e-health System

ACS Readers play a vital role in HK government eHealth system and vaccination programme

Thousands of Hong Kong identity card (HKIC) readers have been delivered to healthcare providers who are encouraged to use the readers for patient registration, record activation and obtaining sharing consent to access the eHealth system. The readers help capture patients' personal particulars stored in the smart HKIC to ensure data accuracy and security. Apart from daily operations, the readers are now being used in COVID-19 vaccination programme for the purpose of vaccination record.
