CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

MANAGEMENT DISCUSSION AND ANALYSIS

The following discussion and analysis should be read alongside with the unaudited consolidated financial results of the Group (hereafter referred to as “ACS” or the “Group”) for the three months and nine months ended 30 September 2013.

FINANCIAL REVIEW

Comparing the third quarter ended 30 September 2013 with the third quarter last year, the sales revenue increased by 30% to HK\$54.9 million from HK\$42.1 million. The gross profit increased by 67% to HK\$35.4 million. The three main types of operating costs, i.e. administrative expenses, research and development expenses, and selling and distribution costs increased respectively by 27%, 102% and 68% to HK\$9.4 million, HK\$10.6 million and HK\$5.3 million. The net profit after tax for the third quarter ended 30 September 2013 increased by 106% to HK\$8.4 million, from HK\$4.1 million for the third quarter ended 30 September 2012.

Comparing the first nine months of 2013 with the first nine months of 2012, ACS recorded 23% increase in sales revenue to HK\$141.3 million and 40% increase in gross profit to HK\$86.0 million. This is mainly due to the overwhelming success of our more advanced in-housed developed technologies, which in turn attracted market leading solution providers into the ACS client base. These technologies included the state-of-the-art bus validators and the automatic fare collection and customer loyalty software.

	Three months ended			Nine months ended		
	30 September		Change	30 September		Change
	2013	2012		2013	2012	
	HK\$'000	HK\$'000		HK\$'000	HK\$'000	
Asia Pacific	21,676	12,083	79%	56,739	30,091	89%
Europe	12,254	16,254	-25%	46,017	41,402	11%
The Americas	19,875	11,770	69%	34,079	33,450	2%
Middle East and Africa	1,143	2,038	-44%	4,487	9,982	-55%
	54,948	42,145	30%	141,322	114,925	23%

Sales breakdown by region shows significant increase in the Asia Pacific. Substantial sales were made to the Asia Pacific in this quarter of our payment solutions. This resulted in an overall growth of 89% in the region in the first nine months. Slight growths were also recorded in Europe and The Americas on a nine-month basis. Sales dropped 55% on a nine-month basis in Middle East and Africa. An overall growth of 30% and 23% can be observed on a three-month and a nine-month basis. There may be wide fluctuations in the sales among the different regions depending on the time of fulfillment of relatively big orders in one region or another. Since ACS has a wide geographical coverage, the total sales in all regions tend to be more stable.

The three main types of operating costs totaled HK\$65.2 million this year representing 39% increase from HK\$46.9 million last year. The main reason of the increase was the rise in research and development expenses. Specifically, ACS has placed emphasized efforts into developing new products and solutions to support the future growth of the company.

DIVIDEND

The Board does not declare an interim dividend in respect of the nine months ended 30 September 2013. The declaration, payment, and amount of future dividends will be decided by the Board and will depend upon, among other things, the Group's results of operations, capital requirements, cash flows, general financial conditions, and such other factors as the Board may consider important.

BUSINESS REVIEW

ACS has been investing more resources in research and development to improve products and solutions and in selling and distributions to reach out to customers. As a result, the Group is seeing improved sales. In the third quarter ended 30 September 2013, the Group released a few new products.

1. ACR1283L VisualVantage Standalone Contactless Reader, which is ideal for payment customer loyalty programs and time and attendance systems;
2. Mobile Device Card Readers – ACR38U PocketMate II and ACR31 Swipe, which are suitable for mobile smart card and magnetic card applications.

One example of the use cases was that the Group's ACR89 was selected to help streamline the Labor-Related Processes in a Middle Eastern Country. It enables a web-based e-government application that simplifies all labor-related management and processes between companies and the government.

PROSPECTS

With 18 years of experience in the hardware, software and application business in the smart card industry, the Group has been developing more and more sophisticated products and solutions in order to expand the business. In particular, the Group invested in the automatic fare collection payment solution business, which can improve the gross margin of the Group and future growth of the Group. A lot of the developing countries are exploring electronic payment systems for their public transportation. The Group is in a very strong position to support such systems with its inhouse technology. A healthy growth of business is expected by strengthening our smart card reader and terminal products and by providing automated fare collection solutions.
