**Disclaimer**

The ACR31, ACR32 and ACR35 card readers have been tested by ACS for their compatibility with the listed mobile devices and its operating system version via the “AJ Demo” demo application developed by ACS.

Actual performance of such card readers may vary depending on individual mobile device. Other factors like software version, firmware version, operating system setting and damages of the mobile device, operating environment and software design of the end-application may affect the performance and operation of the card readers.

Supported devices include but not limited to the listed models with tested operating system(s). If a mobile device and/or its operating system are not listed in this document, ACS does not guarantee the card reader’s compatibility with that device.

ACS endeavors at the time of publication to ensure accuracy and completeness of the information provided herein, and ACS reserves the right to make any changes on this document without prior notice.
